

Wellness
BioSciences Rx

Dear Valued Patient,

We are pleased to inform you of a new opportunity to significantly advance your overall health and wellness!

We have recently begun utilizing CBD with some of our patients and have already seen some incredible results. While you may already be familiar with the term CBD, it's important to note—not all CBD is the same. As your healthcare provider, I have taken it upon myself to research not only the validity of using CBD for a myriad of health-related issues but also to find the safest, most efficacious product available on the market today.

While there may be other good products available in the marketplace, Wellness BioSciences Rx is the company that I feel most confident in recommending as your doctor based on their scientific data and my own personal experience with the product.

Wellness BioSciences Rx creates medical-grade CBD and wellness products that are sourced and manufactured using the highest standards of quality and purity which greatly exceed the existing standards of all regulatory agencies. They have conducted extensive testing to ensure that their products are not only free of fillers, allergens, and contaminants but are also formulated to deliver the maximum bioavailability and efficacy of any CBD on the market.

They back these claims with rigorous third-party testing and certificates of analysis and have even received FDA approval on the specific products that fall under the FDA's purview.

Having taken the Hippocratic oath, my number one priority as your healthcare provider is to make sure that you are being offered the purest and most scientifically-based care possible. When it comes to CBD products, I personally trust Wellness BioSciences Rx above all other brands.

It's our deepest desire to provide you the best in health and patient care. Please let us know if you have any questions about integrating Wellness BioSciences Rx CBD into your wellness regimen today!

Sincerely,
